## AAE Systems, Inc. Awarded USD 24M Contract

**Sunnyvale, CA (13 November 2007)** – AAE Systems, Inc. (AAE), a satellite equipment manufacturer and Information and Communication Technologies (ICT) system solutions provider has been contracted to provide a turnkey communications system in the Middle East. Under the first phase of this multiphase project, AAE is contracted to design, provide, and install a multifaceted ICT system to be used by the various government departments, service agencies, and field offices.

The ICT system includes a combination of innovative wired and wireless technologies, fully integrated into a seamless system interconnecting office level networks. Voice, data, and video services will be provided and tailored to the specific needs of the respective offices and agencies including national and provincial government offices; regional and rural medical facilities; financial institutions; emergency management agencies; and public service agencies.

AAE's Eclipse Digital Satellite Routers, an all in one MF TDMA satellite router that supports True-Mesh and Star topologies, are incorporated as a major part of this ICT network, providing the satellite backbone for countrywide connectivity.

The comprehensive network applications incorporate a variety of platforms and integrated subsystems including:

- WiMax and Wi-Fi extension services
- Emergency services mobile radio communications system
- Fixed, mobile, and portable communications platforms
- Vehicular communication system platforms
