AAE Systems, Inc. Provides Solution for School in the Middle East

Sunnyvale, CA (9 March, 2010) – AAE Systems, Inc. (AAE), a satellite-based equipment manufacturer and turnkey communication solutions provider, has installed a comprehensive communications solution for an education customer in the Middle East. The customer is a private international school with multiple campuses accommodating a total of more than 800 faculty staff and students ranging in grade levels from pre-school through high school.

Wireless links were setup between the main campuses and the ISP for Internet connectivity. The new solution enables the school to participate in a sister school program, where students from all over the world exchange cultural insights over video. With the new system, video sessions can be established easily and occur without interruption.

The comprehensive solution includes upgrades to network infrastructure: an update of the phone system to an IP-based solution, campus-wide secure authenticated wireless connectivity (Wi-Fi), as well as a new Internet based learning system complete with a new web site, virtual classroom, e-mail system, firewall, and web filter.

As a provider of comprehensive ICT solutions, AAE brings expertise in the design and deployment of wireless and terrestrial telecommunications solutions, data center infrastructure, mobile communications solutions, signal repeating stations, radar and surveillance equipment, e-government and e-learning platforms, and mapping systems.

About AAE Systems, Inc.

AAE Systems, Inc., with over 25 years of experience in global systems integration, product design and manufacturing, focuses on satellite communications. Located in the Silicon Valley, AAE's equipment and services are used in the Middle East, Africa, Asia, Central America, and Europe by customers in industries including petrochemicals, military, aeronautics, government, and telecom. AAE is recognized for excellence in the timely delivery of custom, complex, mission critical solutions that incorporate a range of competencies in the wireless, satellite and terrestrial telecommunications specialties.

AAE Systems, Inc. is headquartered in Sunnyvale, CA. For more information, please visit www.aaesys.com.
